

New OpenText™ ProviderLink™ sign-in page coming soon

This fall, you will see a new sign-in page for ProviderLink. Although it will look a little different it will still work the same way.

If you access ProviderLink by visiting login.providerlink.healthcare.covisint.com and your username contains the @ symbol, please disregard this notice.

What's staying the same?

- The steps to sign in won't change. You will enter the same username and password as you do today. You may be required to change your password if it doesn't meet the new complexity requirements.
- The URL providerlink.healthcare.covisint.com/providerlink remains the most direct way to visit ProviderLink. If you access ProviderLink another way, you may continue to do so.

Why is the sign-in page changing?

The new sign-in page:

- Delivers a low-friction authentication experience.
- Mitigates the risk of unauthorized access.
- Has a consistent look with other OpenText web properties.

As OpenText continues to improve its services to make it easier for you to do business with us, we are close to reaching a key milestone with the launch of a new ProviderLink sign-in experience in the fall. Watch your inbox over the coming weeks for more information about the change and our launch announcement.
